PROFESSIONAL SUMMARY

Detail-oriented AI Data Specialist, Systems Technician, and IT & Programming Student with hands-on experience across Linux environments, system administration, virtualization, AI model evaluation, and software quality assurance. Proven track record of operational leadership, project management, and analytical problem-solving developed through independent technical experimentation and small business ownership. Recognized for exceptional pattern recognition, edge-case analysis, and maintaining data integrity in fast-paced, deadline-driven environments.

TECHNICAL & PROFESSIONAL SKILLS

AI Evaluation & QA: Data Annotation (Text, Image, Video), Multi-Step Reasoning Audit, Edge-Case Identification, Prompt Quality Testing, Model Reliability Auditing

Software & Web Development: JavaScript, TypeScript, Python, HTML5/CSS3, React, Devvit Web API, Git/GitHub Version Control

Systems & Infrastructure: Linux (Ubuntu, Debian, Kali, Arch), Windows Systems Administration, Virtualization (VirtualBox, Proxmox, Docker), Raspberry Pi / ARM Single-Board Computers, Multi-OS Provisioning

Operational & Technical Management: Project Scheduling & Workflow Optimization, Client Relationship Management, Contract Negotiation & Drafting, Technical Documentation, Cost Control & Expenditure Tracking

RELEVANT PROFESSIONAL EXPERIENCE

AI DATA SPECIALIST / QA AUDITOR | **Outlier & Alignerr** (Contract / Remote) **10/2025 – Present**

- Evaluate and annotate multi-modal datasets (text, image, video) to improve model accuracy, logical coherence, and output safety.
- Perform high-precision auditing of AI reasoning outputs, identifying complex edge cases and structural anomalies to enhance dataset reliability.
- Deconstruct detailed, evolving guidelines into standardized operational workflows for consistent dataset evaluation.
- Leverage pattern recognition and structured analytical thinking to stress-test prompt engineering pipelines and code generation algorithms.

INDEPENDENT CONTRACTOR & OWNER | **Thumbs-Up Commercial & Residential Services Inc.** **04/2018 – 11/2025**

- Directed end-to-end operations for a residential and commercial service firm, managing client projects, schedules, and resource allocation.
- Drafted and negotiated service contracts, project scopes, pricing models, and change orders to ensure project profitability and legal compliance.
- Maintained direct client communication, delivering technical walk-throughs, cost estimates, and operational reports.
- Administered project budgets, tracked expenditures, and optimized internal workflows to achieve consistent on-time delivery.

TRANSITIONAL HOUSING OPERATIONS MANAGER | **Change 4 Life** | Parkton, NC **05/2016 – 06/2017**

- Supervised daily facility operations, ensuring strict compliance with operational standards, program guidelines, and safety protocols.
- Facilitated communication between case managers, rehabilitation programs, probation services, and external stakeholders.
- Managed client intake workflows, vendor relationships, and facility inventory to maintain consistent operational stability.

GRAVE MARKER DESIGNER / CAD TECHNICIAN | **Joyner's Memorial, Inc.** | Wilson, NC **02/2011 – 02/2013**

- Engineered precision custom memorial designs using CAD software, meeting strict client specifications and deadline requirements.
- Executed quality control evaluations on custom orders while maintaining synchronized coordination between administrative and field teams.

EDUCATION

Fayetteville Technical Community College (FTCC)
A.A.S. – Information Technology: Computer Programming & Development
Currently Enrolled / Expected Graduation
Fayetteville, NC

FEATURED TECHNICAL PROJECTS

StreakRush (Reddit Devvit Web App)
Developed an interactive, probability-based guessing game using JavaScript and React deployed on Reddit's Devvit platform.

Homelab & SBC Virtualization
